## NEW TECHNOLOGICAL SOLUTIONS FOR ELECTROSTATIC DISCHARGE OF PERSONS HUMAN ELECTROSTATIC DISCHARGE

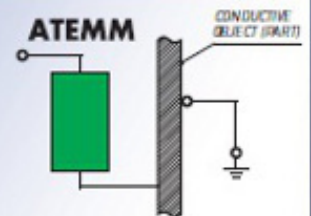

Static electricity is a natural and very frequent phenomenon. Preventions of electrostatic discharges are extremely difficult and expensive. Discharge of static electricity happens when you touch a grounded object or another person with a spark or with a slight itching on the skin surface.

ATEMM<sup>®</sup> products provide immediate and insensitive discharge of your static electricity.

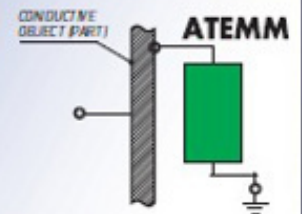

**ATEMM  
GREEN POINT PADS**

*Suitable for installing on conductive and grounded objects (surfaces):  
metal doors and windows,  
metal fences,  
car door frames,  
metal housings of machines and equipment,  
metal housings of household appliances, ...*

**ATEMM H-ESD  
(HUMAN ELECTROSTATIC  
DISCHARGE)**

*Suitable for indirect discharge via conductive, ungrounded objects (surfaces):  
conductive car door handles,  
conductive bezels for LCD / LED devices,  
conducting bezels of ATMs,  
note and bill acceptors,  
brushes for discharging large surfaces, ...*

**ATEMM H-ESD  
WIRE**

*Suitable for indirect discharge via installation in products with textiles:  
car seat covers,  
covers for (metal) chairs,  
mattresses, ...*
